

camera.reset

Sets all options back to their default values. No assumption should be made about the state of the camera when it is powered on, for example, it shouldn't be assumed that a camera is powered on each time with default options. **This command was added in API level 2.**

Parameters

- This command has no parameter in request body.

Results

- This command returns no result in response body.

Errors

- **invalidParameterName:** The input parameter name is unrecognized.
