

camera.stopCapture

Stops video capture or open-ended interval image capture, determined by **captureMode** in [Options](#)

(<https://developers.google.com/streetview/open-spherical-camera/reference/options?hl=zh-cn>). If the corresponding **startCapture**

(<https://developers.google.com/streetview/open-spherical-camera/reference/camera/startcapture?hl=zh-cn>)

is for interval image capture and the termination condition is set (e.g. it terminates after capturing 10 images), then **stopCapture** is not needed, however, it should still be treated as a valid command for early termination. **This command was added in API level 2.**

Parameters

- This command has no parameter in request body.

Results

- **fileUrls**: A list of absolute URLs, pointing to video files or image files for open-ended interval capture.

Errors

- **disabledCommand**: Command is currently disabled; for example, the capture has already been stopped.
- **invalidParameterName**: The input parameter name is unrecognized.

Command I/O

Command Input

none

Command I/O

Command Output

```
{
  "results": {
    "fileUrls": [
      "url1",
      "url2",
      "url3",
      ...
      "urln"
    ]
  }
}
```

Command Output (Error)

```
{
  "error": {
    "code": "disabledCommand",
    "message": "Command is currently disabled."
  }
}
```
